

We recognise that today's list of challenges is long, and the path forward may be unclear. Every day, you work with a variety of individuals with different needs. With so many resources and so little time, it can be hard to know which tools would be ideal to help those you serve meet their full potential. But you can count on us to lighten your load by providing you with up-to-date and relevant tools that meet the needs of today's population.

We're rolling out the red carpet for some exciting new products! Please take some time to explore [what's new](#).

Upcoming webinars

An Overview of the New MMPI-3

This webinar provides a brief overview of the Minnesota Multiphasic Personality Inventory-3, the most up-to-date, newly-normed version of the MMPI. The test co-author will describe the rationale for, and methods used to develop the MMPI-3, as well as materials available to score and interpret the MMPI-3 in mental health, medical, forensic, and public safety settings.

Getting to know the PEDI-CAT, an online caregiver questionnaire that assesses functional capacity in children and adolescents

Learn about the new Pediatric Evaluation of Disability Inventory Computer Adaptive Test (PEDI-CAT). This webinar will provide an overview and demonstration of this computer adaptive test that is now available on Q-global. Participants will also learn about the psychometric updates, scores provided and basic interpretation, with emphasis on the changes from a desk-top version to the new web-based format. Administration and usability options will be presented including remote administration for telehealth scenarios, and the new Autism Spectrum Disorder scale.
